

Portfolio

1. Forensic cases

- Worked with the Maharashtra State police and Sales tax(Maharashtra) as a forensic investigator. I have worked on 100+ forensics cases. Some of them are described below.
- My job was to investigate financial business records to detect Financial fraud. One such case included tax evasion by tampering with software application used by the businessmen. Generation of fake bills which were not logged in the database which eventually led to decreased tax amount.
- Another case included misconfiguration of Domain which led to extortion by third party using this exploit. These conclusions were found by Email Header analysis.
- Have done log analysis in a case involving a fraudulent employee at higher a position who Bridged company policies and configured his email client to discard email logs after 24 hours.

2. Compliance Management

- Have formulated the standard operation procedures and Information security policies as per ISMS Frameworks for one of the leading antivirus company.
- Firewall Management(Rules and Policies) for a SAP company Based in the United Kingdom as per GDPR and ISMS Regulations.

3. Risk Assessment

- Done multiple projects in Risk assessment in various sectors such as Mechanical, Banking and Education.
- It includes Vulnerability assessment, penetration testing and Risk ratings and Technical Report.

4. Training

- Conducted forensics workshop for Maharashtra state government employees (sales Tax and state Police)

- Conducted Corporate training on Cyber forensics and cybercrime investigation
- Conducted training on Vulnerability and penetration testing for One of the famous colleges Under Pune university
